Take charge of your health with ICE

Dover, DE, September 5, 2006--There is a movement currently to have everyone set up an ICE entry in their cell phones. ICE standing for In Case of Emergency. This is where you put the phone number of the person you want emergency personnel to contact for you. A local Dover, DE couple, Rolf & Carol-Ann Harding have taken this a giant step further. They have combined their forces to program and develop the ICE drive.

New laws such as the "Information Technology for Health Care Quality Act" and the "Wired for Healthcare Quality Act" are targeted to lower insurance costs, cut down on medical mistakes, and make a "paperless" office. How easily will you be able to get a copy of your medical history? Will you have to pay more for you history? If you travel to another country will they be able to get your medical history quickly and easily? With the ICE drive on you these are not questions you will have to worry about. The ICE drive is a USB drive, which houses your medical history. The ICE drive may save your life. Senator Kennedy and Senator Clinton have been very vocal about the new laws regarding the changing face of healthcare. Take control of your medical history and the care you receive.
